Review By HOTUDCaptures and Snapshots. Level 3 has you defending yourself in Club 30 against Mr Big's task force And the final level has you in an arena fighting Mr Big's Storm Troopers and plasma cannon as Moonwalker himself.. Although you start out with 20 lives, you'll find that they'll dwindle down very quickly.

Level 3 and 4 are undoubtedly the best part of the game, although you'll have to suffer through very boring and frustrating levels 1 and 2 to get there.. 22 / 5 - 18 votesDescription of MoonwalkerMoonwalker is a typical movie-licensed title with various different action levels, although it's quite unique in a sense that it's based on a musical movie-- starring Michael Jackson, no less.. The first two levels are frustrating because you aren't given any weapons-- all you can do is avoid fans and obstacles.. Two of Michael Jackson's songs have been included in the game, and they are recognizable even on PC speaker and aren't very irritating (although you can turn them off). Overall, this is a decent movie translation, although most people will likely get fed up with Levels 1 and 2 and give up trying to get to the (much better) second half..
